Education

Master of Business and Science in Cybersecurity

Rutgers University – New Brunswick, NJ, USA

Jan 2026 – Present

CGPA: 4.0/4.0

Bachelor of Technology in Computer Engineering

K. J. Somaiya Institute of Technology, Mumbai, India

2022 – 2025

CGPA: 8.50/10

Diploma in Computer Engineering

Shri Bhagubhai Mafatlal Polytechnic, Mumbai, India

2019 – 2022

Percentage: 92%

Relevant Experience

IT Student Coordinator, Rutgers Professional Science Master's Program

May 2026 – Present

- Provided IT support for university events by configuring audiovisual equipment, presentation systems, and network connectivity to ensure seamless event operations.
- Assisted with endpoint setup, software installation, and routine system maintenance across departmental IT infrastructure.
- Collaborated with fellow student coordinators to troubleshoot hardware, software, and connectivity issues while minimizing service disruptions.
- Followed standardized operational procedures for incident reporting, equipment management, and technical support documentation.
- Delivered responsive technical assistance to faculty, staff, students, and event participants in fast-paced environments.

IT Engineer, Jones Lang LaSalle (JLL)

Feb 2025 – May 2025

- Configured, assembled, and deployed desktop systems based on client requirements and organizational standards.
- Diagnosed and resolved hardware, software, printer, and peripheral issues while ensuring minimal downtime for end users.
- Performed routine Tally backups and maintained secure handling of organizational financial data.
- Assisted in network troubleshooting, monitored firewall activity, and supported endpoint security initiatives.
- Collaborated with cross-functional teams to resolve technical incidents and improve end-user support.

IT Support Intern, Blacksoil Pvt. Ltd.

Jun 2023 – Jul 2023

- Installed, configured, and maintained desktop systems supporting day-to-day business operations.
- Resolved hardware, software, and peripheral issues across multiple departments to minimize operational downtime.
- Conducted scheduled Tally backups while ensuring data integrity and secure record management.
- Collaborated with internal teams to deliver responsive technical support and improve user experience.

IT Trainee, G-Info Solutions

Sep 2021 – Oct 2021

- Assembled and configured desktop systems for client deployments and business environments.
- Supported Identity and Access Management (IAM) operations using Microsoft Azure.
- Installed antivirus software and enterprise applications across Windows endpoints.
- Diagnosed and resolved hardware, software, and peripheral issues during deployment and post-installation support.

Projects

PhishShield | *Python, Tkinter, Pandas, CSV*

- Developed a Python-based phishing URL detection tool that classifies links as Safe, Suspicious, or Likely Phishing using rule-based analysis and a large synthetic dataset.
- Built a desktop GUI that allows users to paste any URL and receive an immediate risk label with a simple explanation.
- Implemented file-based data processing to read URL datasets and generate scored output files for analysis and reporting.

Keyless Door Authentication System | *Python, OpenCV, Librosa, Scikit-learn*

- Developed a multi-factor authentication system integrating facial recognition, voice authentication, and keypad verification.
- Leveraged Python, OpenCV, Librosa, and K-Nearest Neighbors (KNN) to deliver accurate, low-latency user authentication.
- Enhanced security and user convenience by eliminating dependency on traditional physical keys.

E-Waste Management System | *Java, Android, Firebase*

- Developed an Android application connecting buyers and vendors for efficient electronic waste management using Firebase.
- Designed intuitive user interfaces and implemented backend integration for secure data storage and real-time updates.
- Improved system usability through automated reporting and streamlined waste management workflows.

Technical Skills

Cybersecurity & Networking: Wireshark, Burp Suite, Cisco Packet Tracer, Network Troubleshooting, Endpoint Security, Incident Management

Cloud & Platforms: Microsoft Azure, AWS, Google Firebase

Programming Languages: Python, Java, C#, C/C++, SQL

Frameworks & Tools: React, Git, GitHub, Android Studio, VS Code, OpenCV, Scikit-learn, Matplotlib, Seaborn
